MAKING THE DIFFERENCE

---

OMEGA  
**WHOLESALE**

## MANAGEMENT AND BUSINESS CONTROL FOR NATIONAL AND INTERNATIONAL INTERCONNECTION

Understanding challenges and requirements of business growth, maximizing revenues from interconnection agreements. Clear accounts, eternal friendships.

Telecommunications market structures in WHOLESale (WSL) area all operators that are interconnected, in order to exchange usage from different services and/or technologies. There may also be circuit rentals, links and additional services (maintenance, new interconnections) that involve an exchange of information with operators and have internal and external administration of invoices and statements, and provide at least monthly estimates of costs, income, expenses and revenue for the financial area.

The interconnection chaos between suppliers is cleared up using our solution.

Omega Wholesale allows the company to reduce manual processes substantially, speeds reconciliation with suppliers for faster time to revenue, and easily configures new partner agreements for enhanced service offerings.

Helps the company to streamline its operational processes across its business, thus improving its time to market and revenue as well as visibility and control

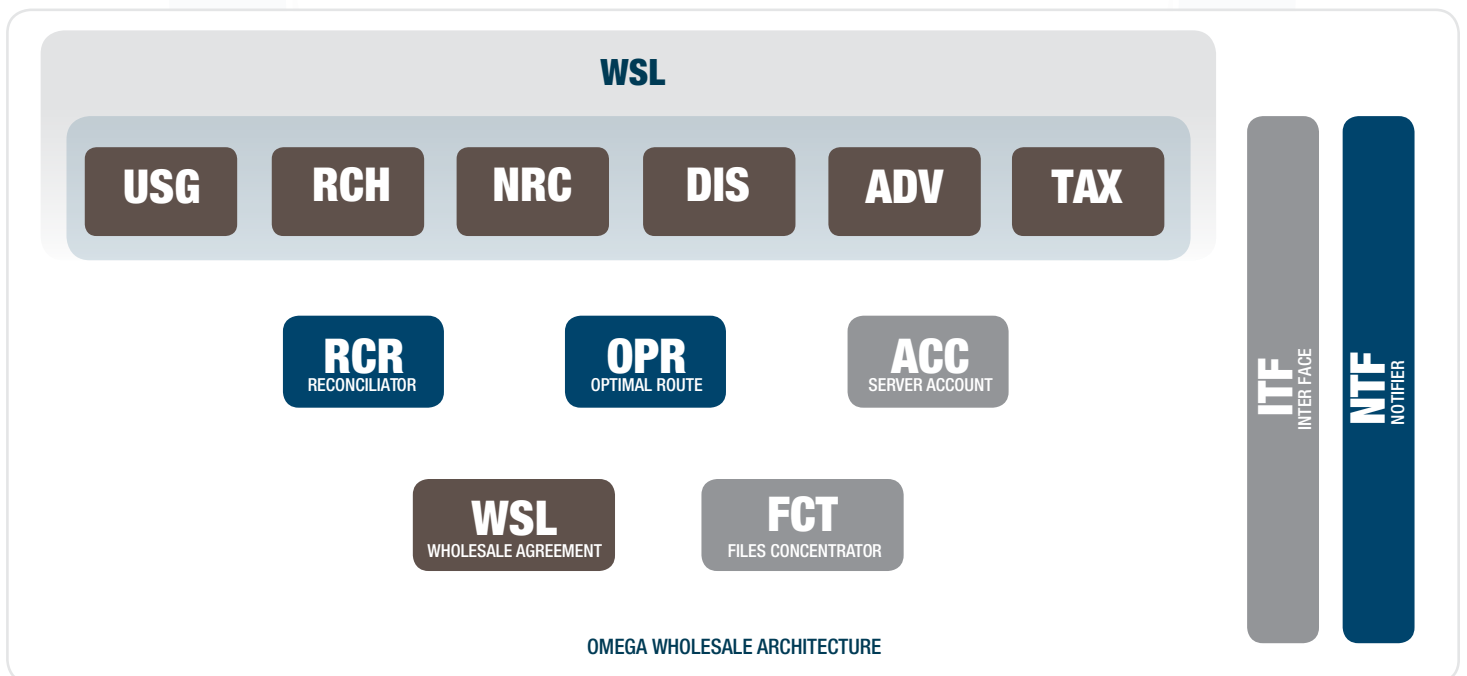

Omega Wholesale is a business support system that manages relationships between national and international interconnection suppliers.

## FAST AND EASY RECONCILIATION THAT ENSURES YOUR REVENUE WITH SUPPLIERS

### OMEGA WHOLESALE MODULES:

#### WHOLESALE AGREEMENTS (WSL)

- Allows to configure the features needed for the system.
  - Interconnected operators and contracts
  - Interconnection and transport contracts.

#### SERVER ACCOUNT MANAGEMENT (ACC)\*

Manages the accounts of servers needed for communication between internal and external servers (operators), thus allowing authorized operators to deposit their data in your network.

#### FILES CONCENTRATOR (FCT)\*

Enables record collection. Its goal is to bring data files from operator servers to your network.

#### CHARGING (USG)

Performs management and administration of CDR pricing.

#### BILLING ENGINE (BIL)

Performs the administration and management of billing recurrent charges (RCH), non recurrent charges (NRC), discounts (DIS), adjustments & returns (ADV) and taxes (TAX), issuance of invoices or statements.

#### RECONCILIATION (RCR)

Manages and operates the criteria necessary to reconcile traffic between operators.

#### LEAST COST ROUTING (OPR)

Provides tools for decision-making in the carrier routing traffic to different destinations, considering parameters of price, usage average and quality that suppliers provide, i.e. ranks all pricing lists received per destination.

*Available in version 1.5.*
